DIVERSE. VISION.

OUR UNIQUE PERSPECTIVE COMES FROM EXPERTISE IN MANY AREAS.

With a diverse range of construction expertise and experience, Ledcor Civil & Infrastructure can be who you need us to be, do what you need us to do. We have been doing it for over 65 years—the right way. Always.

We specialize in a wide array of projects: mass excavation and earthmoving; grading and paving; drilled and driven pile installation; roadway maintenance; utilities installation; structural concrete; renewable power; and civil site developments.
PARTNER. PERFECT.

COLLABORATION IS THE LEDCOR WAY.

Ledcor’s very first project involved infrastructure construction. Sixty-five years later, we’re still experts in all aspects of civil and infrastructure construction.

But what truly sets us apart is our belief that every project—your project—is more than concrete and steel. It is about people and the power of partnerships. We complete your work with integrity. And welcome you as a colleague, collaborator and vital member of our team.

Ledcor Civil & Infrastructure is for clients who want partners, not just suppliers. Because our goal with every client is to create a relationship that lasts a lifetime.

Industrial Site Development
Our experience in on-site field installation, earthwork, and piling is what our clients in the Industrial and Oil & Gas sectors count on. Ledcor can leverage our expertise to provide industrial clients with a full end-to-end solution.

Mine Site Development
Ledcor works on projects requiring large-scale excavation and grading under extreme conditions. We are capable of moving and mining millions of cubic metres of earth and rock for site development and aggregate production.
OUR SERVICES

Site Development
We handle all aspects of site development and preparation.
- Mass excavation
- Rock excavation
- Grading

Civil Construction
Our construction expertise and experience is unmatched.
- Civil and industrial concrete structures
- Underground utilities
- Retaining walls
- Drilled and driven piles
- Power system design and construction

Infrastructure Construction & Development
Ledcor’s roots are in road construction. Today, it is still one of our core service offerings.
- Grading
- Aggregate production
- Asphalt production & placement

Construction Services
In addition to site work, we can provide you with tailored construction management solutions.
- Project management
- Procurement
- Design-build services
- Constructability reviews
- Roadway operations and maintenance

Renewable Energy
Ledcor has experience developing and constructing run-of-river hydroelectric facilities and wind power projects. By focusing on clean renewable forms of energy, we are ensuring power for future generations while minimizing the impact on our environment.

Utilities
Our expertise extends to both underground and above-ground hydro and electrical utilities across all sectors. Our capabilities also include fibre optic network placement.
Transportation
Ledcor’s attention to quality and commitment to safety are just a few reasons why clients rely on our roadbuilding and highway/infrastructure maintenance expertise.

Infrastructure
From resource roads to highway and bridge construction, Ledcor does it all. Our broad range of experience includes successful partnerships in Design-Build and Public Private Partnership (P3) projects.

Neighbour. Mentor.
It’s not only jobs we bring to the community.

Ledcor gives back to the communities in which we operate. We aim to hire local workers, choose local vendors, and provide support on the community level. We have a long history of proactive aboriginal and community relations. It is more than just building bridges or roads. It is about building legacies.
FOR OVER 65 YEARS, THE LEDCOR GROUP HAS BEEN BUILDING WITH INTEGRITY.

The Ledcor Group of Companies is one of North America’s largest employee-owned construction companies. Founded in 1947 in Alberta’s oil patch, we now have offices across North America and thousands of dedicated employees. Through thoughtful and strategic decision-making, Ledcor has become one of the most diversified construction companies. Our straight-forward approach has been the foundation of our business and the reason why clients come back to us over and over.
